Picture reading	4 marks
Letter writing	5 marks
Language functions	5 marks
Complete dialogue	4 marks
Dialogue writing	3 marks

#### **IV. Read the following passage and answer the questions set on it. (10 × 1 = 10)**

Soybean belongs to the Legume family. The beans are the seeds of the leguminous soybean plant. They can be grown in a wide variety of soils and a wide range of climates. Soybeans are versatile as they can be used as whole beans, soy, sprouts, or processed as a variety of food items, such as soy milk, tofu, textured vegetable protein, soy sauce, oil, and margarine, and soy dairy alternatives. They are also used for making candles and biodiesel.

Soy is excellent protein-rich food. It is low in saturated fats and cholesterol-free. Vitamin B is plentiful in it. The minerals like magnesium, calcium, iron, potassium, and copper are found in abundance in Soy. It is also rich in fiber. Soy is highly recommended because of its ability to lower the levels of Low-Density Lipoprotein (LDL), the bad cholesterol. The food and drug administration has confirmed that foods containing soy protein are likely to reduce the risk of coronary heart disease. An easy way to take soy is to drink it in the form of soya milk. It is not available with added flavors. Soya milk does not contain lactose (Milk sugar) and can be drunk by those who are allergic to normal milk. To get soya milk, soybeans are soaked in water, ground, and then strained.

**24. Which family do soybeans belong to?**

Ans : Legume family.

**25. Where are soybeans grown?**

Ans : In a wide variety of soils and a wide range of climates.

**26. Mention one of the food items prepared using soybeans.**

Ans : Soy milk, tofu, oil, etc.

**27. What are the other uses of soy?**

Ans : Soy is used to make candles and biodiesel.

**28. Name the bad cholesterol mentioned in the passage.**

Ans : Low-Density Lipoprotein (LDL).

**29. What has the food and drug administration confirmed about soy protein?**

Ans : Foods containing soy protein are likely to reduce the risk of coronary heart disease.

30. In recent times soy has been highly recommended because it

- (a) is rich in vitamin B.
- (b) Can lower the levels of Low-Density Lipoprotein (LDL).
- (c) has high-quality protein

Ans : (b) Can lower the levels of Low-Density Lipoprotein (LDL).

31. Why can soya milk be drunk by those who are allergic to normal milk?

Ans : Because Soya milk does not contain Lactose (Milk sugar).

32. Add a prefix to the word ‘saturated’ to form its antonym.

Ans : unsaturated.

33. The \_\_\_\_\_(versatile) of soybean is proved by its use as whole beans, sprouts, and a variety of processed food items.

(Fill in the blank using the appropriate form of the word given in the bracket)
